Dramatic Reduction in Painkiller Dependency Within Six Months

Tags: Period Cramps, General Health, Recent

Duration of Use: 6 Months

Summary:

I used to suffer from such debilitating menstrual pain that I had to take three to four painkillers in the first two days of my cycle just to function. My gynecologist advised me to try Saukhyam. In just six months of making the switch, my pain has reduced so much that I only need one painkiller occasionally, and sometimes none at all. The soft banana-fiber core has made my period cramps completely manageable.
