Steady Cycle Regularity Reclaimed After Post-Childbirth Issues

Tags: Irregular Periods, General Health, Long-term

Duration of Use: 8 Years

Summary:

After childbirth, my cycles became highly irregular, often delayed by 35 to 40 days. I switched to Saukhyam pads eight years ago. Over time, my cycles stabilized, and they have been consistently regular at 32 days for years now. The pads are comfortable, hygienic, and extremely durable. They still look and feel great after years of washing. Switching to Saukhyam was the best decision for my long-term reproductive health.
